Subject: Better Together: Help us grow the ISN community

To: narayan.nephro@gmail.com <narayan.nephro@gmail.com>

Dear Narayan,

I hope this e-mail finds you well.

As we all know, 2020 has been full of unprecedented events. Through it all, the ISN has quickly evolved to support its members worldwide at every step.

The ISN will continue to serve the global nephrology worldwide in these difficult times – but really, none of this would be possible without the **support of our members**.

Thank you, as a member of the ISN Sister Renal Centers Committee, for not only being an ambassador of the ISN in your local context, but also for **helping the ISN community grow by regularly inviting your colleagues, fellows, trainees and more to join us as ISN members**.

To this end, we have developed a [communications package on ISN membership](#) that explains the many benefits of joining the ISN community and membership options – for example, **please promote** that all resident doctors in training get their 1st year of ISN Membership for FREE.

Please share this information with all your contacts working in kidney health, and encourage them to join the ISN community!

When you participate in local and regional meetings, represent the ISN and try to show the attached slides and share the attached membership brochure. After all, maintaining community all while staying safe at home is more important than ever today.

Thanking you for all that you do,

Marie-Pierre Smal

International Society of Nephrology

P.S. Our apologies in advance if, serving on multiple ISN supporting groups, you may have received this request more than once. Consider each additional message received an extra reminder of how appreciative we are for the time you commit to the ISN.
